

# Daily Checklist

Date: 7-5-18

<b>Your welfare</b>		
Are you OK? <u>Yes</u>		
Have you contacted your DAWR contact? <u>phone</u>	<input checked="" type="radio"/> YES / <input type="radio"/> No s. 22(1)(a)(ii)	You are required to check-in with your DAWR land based contact every day prior to the Master sending the daily voyage report. If your DAWR contact has not heard from you by the time the daily voyage report arrives, urgent efforts will be made to contact the Master of the vessel immediately to ensure your welfare.
<b>Access to Feed and Water</b>		
<b>Question</b>	<b>Yes/No</b>	<b>Comments</b>
Are there issues with animals accessing feed and water?	<u>N</u>	
Is feed and water continuously available? If not, why, and for how long?	<u>Y</u>	
Is the supply of feed and water appropriate for the conditions?	<u>Y</u>	
Is the equipment monitored and operating efficiently?	<u>Y</u>	
<b>Daily ventilation, temperature and humidity monitoring</b>		
Have there been any issues with the ventilation system?	<u>N</u>	
Are daily temperature readings being taken? On all decks?		Max Temp: <u>28°C</u> Max Humidity: <u>85%</u>
Are these occurring at the same time each day?	<u>Y</u>	
Are these readings capturing the maximum temperature/humidity level each day?	<u>Y</u>	
<b>Daily Animal inspection, monitoring and treatment</b>		
Are animals that require treatment (e.g. shy feeders, heat stressed, injured or ill animals) being identified and brought to the attention of the AAV in a timely fashion?	<u>Y</u>	
For vessels with split level sheep pens - are all sheep in split level pens being monitored daily?	<u>Y</u>	
<b>Pen Condition</b>		
Are the pens in appropriate condition and good order?	<u>Y</u>	

Provide an assessment of the quality of the manure pad in the pens (e.g. dusty, friable, crumbly, muddy, thick, boggy, liquid). What is its approximate depth?	GOOD for most sheep AWASSI Rams still DIFF	
Have any problem pens been identified with respect to pad condition or ventilation? What is being done to manage this?	N	
Is there management and intervention for pads that are deteriorating in condition? What is being done?	Y	Shovelbed cub AWASSI Rams
Is the ventilation in the pens adequate?	Y	
Are any found dead animals removed from the pens in a timely fashion?	Y	
<b>AAV's daily activities</b>		
Does the observer agree with the assessment provided by the AAV in the Daily Voyage Report?	Y	
Are mortalities being accurately recorded and reported?	Y	
Have <i>euthanased</i> animals been counted and recorded <u>separately</u> from those <i>found dead</i> ?	Y	
Have pregnant ewes been identified on the vessel? How many, in what lines? How are they being managed?	N/A	
Are there pregnant cattle on the vessel? How many, in what lines? How are they being managed?	N/A	
Are births and abortions being accurately recorded and reported?	N/A	
How are any neonatal animals managed?	N/A	
Has the AAV carried out any treatments? What for? How? What medications?	Y	VARIOUS FOR - CHITTO Lamb & Pr SHARP - GUTS / STAY FEEDING / Lamb
Are there any other comments regarding conditions or any other aspect worthy of note?		VARIOUS etc NORMAN TALKING
<b>Digital image capture</b> <span style="float: right;">s. 47F(1)</span>		
Images/video captured?	Yes/No	
Digital files catalogued and associated file no	Yes/No

# Daily Checklist

Date: 8-5-2018

<b>Your welfare</b>		
Are you OK? YES STILL!!		
Have you contacted your DAWR contact?	<input checked="" type="radio"/> YES / <input type="radio"/> NO	You are required to check-in with your DAWR land based contact every day prior to the Master sending the daily voyage report. If your DAWR contact has not heard from you by the time the daily voyage report arrives, urgent efforts will be made to contact the Master of the vessel immediately to ensure your welfare.
<b>Access to Feed and Water</b>		
<b>Question</b>	<b>Yes/No</b>	<b>Comments</b>
Are there issues with animals accessing feed and water?	N	
Is feed and water continuously available? If not, why, and for how long?	Y	
Is the supply of feed and water appropriate for the conditions?	Y	
Is the equipment monitored and operating efficiently?	Y	
<b>Daily ventilation, temperature and humidity monitoring</b>		
Have there been any issues with the ventilation system?	N	
Are daily temperature readings being taken? On all decks?		Max Temp: 30 Max Humidity: 95% / 10
Are these occurring at the same time each day?	N	They vary today max humid step ~ 17.30
Are these readings capturing the maximum temperature/humidity level each day?	Y	
<b>Daily Animal Inspection, monitoring and treatment</b>		
Are animals that require treatment (e.g. shy feeders, heat stressed, injured or ill animals) being identified and brought to the attention of the AAV in a timely fashion	Y	
For vessels with split level sheep pens - are all sheep in split level pens being monitored daily?	Y	
<b>Pen Condition</b>		
Are the pens in appropriate condition and good order?	Y	

Provide an assessment of the quality of the manure pad in the pens (e.g. dusty, friable, crumbly, muddy, thick, boggy, liquid). What is its approximate depth?	Steep - Firm & 3-4cm deep A wass, steep pretty like ~ 3-4cm deep	
Have any problem pens been identified with respect to pad condition or ventilation? What is being done to manage this?	Y	yes when water leaks the pad is shoveled out & sand dust applied
Is there management and intervention for pads that are deteriorating in condition? What is being done?	Y	shovel / Scrape & Sand dust
Is the ventilation in the pens adequate?	Y	it was reduced today then ship began to zig zag to airflow which worked well
Are any found dead animals removed from the pens in a timely fashion?	Y	
<b>AAV's daily activities</b>		
Does the observer agree with the assessment provided by the AAV in the Daily Voyage Report?	Y	
Are mortalities being accurately recorded and reported?	Y	
Have <i>ethanased</i> animals been counted and recorded <u>separately</u> from those <i>found dead</i> ?	Y	listed as dead in log & weighed where is recorded.
Have pregnant ewes been identified on the vessel? How many, in what lines? How are they being managed?	N/A	
Are there pregnant cattle on the vessel? How many, in what lines? How are they being managed?	N/A	
Are births and abortions being accurately recorded and reported?	N/A	
How are any neonatal animals managed?	N/A	
Has the AAV carried out any treatments? What for? How? What medications?	Y	Cereal medical Rx for <sup>GMS</sup> <del>runts</del> <del>Abse</del>
Are there any other comments regarding conditions or any other aspect worthy of note?	Y	Ship was closely monitoring shy feeders WBT & zig zagged once hit 80% due to following wind

# Daily Checklist

Date: 9/5/2018

**Your welfare**

Are you OK? yes

Have you contacted your DAWR contact? YES/No

You are required to check-in with your DAWR land based contact every day prior to the Master sending the daily voyage report. If your DAWR contact has not heard from you by the time the daily voyage report arrives, urgent efforts will be made to contact the Master of the vessel immediately to ensure your welfare.

**Access to Feed and Water**

Question	Yes/No	Comments
Are there issues with animals accessing feed and water?	Y	
Is feed and water continuously available? If not, why, and for how long?	N	The main water feed lines to each deck are turned off individually to clean the water trough 5-10 minutes per line OK
Is the supply of feed and water appropriate for the conditions?	Y	
Is the equipment monitored and operating efficiently?	Y	

**Daily ventilation, temperature and humidity monitoring**

Have there been any issues with the ventilation system?	Y	FAN IN Over B 24 broken replaced + A 32 having intermittent problems
Are daily temperature readings being taken? On all decks?		Max Temp: <u>31</u> Max Humidity: <u>92%</u> - fixed quickly when alarm goes off
Are these occurring at the same time each day?	N	Depending on sun & ships 204 206 ceiling will alter timing
Are these readings capturing the maximum temperature/humidity level each day?	Y	

**Daily Animal inspection, monitoring and treatment**

Are animals that require treatment (e.g. shy feeders, heat stressed, injured or ill animals) being identified and brought to the attention of the AAV in a timely fashion?	Y	
For vessels with split level sheep pens - are all sheep in split level pens being monitored daily?	Y	the sheep in the lower level pens seem more comfortable ↑ shade

**Pen Condition**

Are the pens in appropriate condition and good order?	Y	
---	---	--

Provide an assessment of the quality of the manure pad in the pens (e.g. dusty, friable, crumbly, muddy, thick, boggy, liquid). What is its approximate depth?	3-4 cm - some friable to chunky in some esp	
Have any problem pens been identified with respect to pad condition or ventilation? What is being done to manage this?	N	ALWAYS!
Is there management and intervention for pads that are deteriorating in condition? What is being done?	Y	
Is the ventilation in the pens adequate?	Y	
Are any found dead animals removed from the pens in a timely fashion?	Y	
<b>AAV's daily activities</b>		
Does the observer agree with the assessment provided by the AAV in the Daily Voyage Report?	Y	
Are mortalities being accurately recorded and reported?	Y	there was one ewe sheep killed for crew food not recorded on mortality sheet today
Have <i>ethanased</i> animals been counted and recorded <u>separately</u> from those <i>found dead</i> ?	Y	ALWAYS!
Have pregnant ewes been identified on the vessel? How many, in what lines? How are they being managed?	N/A	
Are there pregnant cattle on the vessel? How many, in what lines? How are they being managed?	N/A	
Are births and abortions being accurately recorded and reported?	N/A	
How are any neonatal animals managed?	N/A	
Has the AAV carried out any treatments? What for? How? What medications?	Y	general herd health - ANTI INFLAM VITamins
Are there any other comments regarding conditions or any other aspect worthy of note?	Y	He <span style="color: red;">s. 47G(1)(a)</span> FINOS <span style="color: red;">s. 47G(1)(a)</span> has been crushed for the last 5-6 days much earlier than normal

<b>Access to Feed and Water</b>		
<b>Question</b>	<b>Yes/No</b>	<b>Comments</b>
Are there issues with animals accessing feed and water?	N	Water monitoring and supply is going well
Is feed and water continuously available? If not, why, and for how long?	Y	
Is the supply of feed and water appropriate for the conditions?	Y	
Is the equipment monitored and operating efficiently?	Y	
<b>Daily ventilation, temperature and humidity monitoring</b>		
Have there been any issues with the ventilation system?	N	
Are daily temperature readings being taken? On all decks?	Y	Max Temp: <u>32°</u> Max Humidity: <u>85%</u> very high WBT this am ~ 6 AM ~ 32° Stock good at this time re real HSP values
Are these occurring at the same time each day?	Y	
Are these readings capturing the maximum temperature/humidity level each day?	Y	
<b>Daily Animal inspection, monitoring and treatment</b>		
Are animals that require treatment (e.g. shy feeders, heat stressed, injured or ill animals) being identified and brought to the attention of the AAV in a timely fashion	Y	
For vessels with split level sheep pens - are all sheep in split level pens being monitored daily?	Y	
<b>Pen Condition</b>		
Are the pens in appropriate condition and good order?	Y	

Provide an assessment of the quality of the manure pad in the pens (e.g. dusty, friable, crumbly, muddy, thick, boggy, liquid). What is its approximate depth?	Sheep thick, clay like ~5cm deep no problems with them Cattle thin <del>boggy</del> liquid mostly foeces and is very hoosed out thoroughly and cattle washed every second day	
Have any problem pens been identified with respect to pad condition or ventilation? What is being done to manage this?	N	
Is there management and intervention for pads that are deteriorating in condition? What is being done?	N	Not required for sheep & cattle
Is the ventilation in the pens adequate?	Y	48 hr wash down
Are any found dead animals removed from the pens in a timely fashion?	Y	
<b>AAV's daily activities</b>		
Does the observer agree with the assessment provided by the AAV in the Daily Voyage Report?	Y	
Are mortalities being accurately recorded and reported?	Y	
Have <i>ethanased</i> animals been counted and recorded <u>separately</u> from those <i>found dead</i> ?	Y	
Have pregnant ewes been identified on the vessel? How many, in what lines? How are they being managed?		} NA
Are there pregnant cattle on the vessel? How many, in what lines? How are they being managed?		
Are births and abortions being accurately recorded and reported?		
How are any neonatal animals managed?		
Has the AAV carried out any treatments? What for? How? What medications?	Y	Cerebral shiplerod stuff / LAMB / 6468 - Incentin
Are there any other comments regarding conditions or any other aspect worthy of note?	N	skinny died
<b>Digital image capture</b>		
Images/video captured?		Yes/No
Digital files catalogued and associated file notes recorded?		Yes/No
