

Provide an assessment of the quality of the manure pad in the pens (e.g. dusty, friable, crumbly, muddy, thick, boggy, liquid). What is its approximate depth?		Pads for sheep have become more boggy in the upper deck 5 & 4 outer pens due to heavy run of still ~ 5cm no problem some heave
Have any problem pens been identified with respect to pad condition or ventilation? What is being done to manage this?	Y	shovel & sand dust shovel & some sand dust Problem due to run & being well managed today
Is there management and intervention for pads that are deteriorating in condition? What is being done?	Y	see above
Is the ventilation in the pens adequate?	Y	
Are any found dead animals removed from the pens in a timely fashion?	Y	
AAV's daily activities		
Does the observer agree with the assessment provided by the AAV in the Daily Voyage Report?	Y	But today they did not include the lamb birth - see if included tomorrow
Are mortalities being accurately recorded and reported?	Y	
Have euthanased animals been counted and recorded <u>separately</u> from those found dead?	Y	
Have pregnant ewes been identified on the vessel? How many, in what lines? How are they being managed?	?	supposed to be no pregnant ewes on ship
Are there pregnant cattle on the vessel? How many, in what lines? How are they being managed?	N/A	
Are births and abortions being accurately recorded and reported?	N	today too was found a lamb born to a merino ewe in the merino wharves
How are any neonatal animals managed?	Y	separated into deck 3 It was found sprayed per dent and feed/water and managed but not recorded in today's NW report
Has the AAV carried out any treatments? What for? How? What medications?	Y	general stuff
Are there any other comments regarding conditions or any other aspect worthy of note?	N	- see tomorrow's post on deck

Your welfare		
Are you OK? <u>YES</u>		
Have you contacted your DAWR contact? <u>Email</u>	<input checked="" type="radio"/> YES <input type="radio"/> No s. 22(1)(a)(ii)	You are required to check-in with your DAWR land based contact every day prior to the Master sending the daily voyage report. If your DAWR contact has not heard from you by the time the daily voyage report arrives, urgent efforts will be made to contact the Master of the vessel immediately to ensure your welfare.
Access to Feed and Water		
Question	Yes/No	Comments
Are there issues with animals accessing feed and water?	<u>N</u>	
Is feed and water continuously available? If not, why, and for how long?	<u>Y</u>	
Is the supply of feed and water appropriate for the conditions?	<u>Y</u>	<u>Monethor required</u>
Is the equipment monitored and operating efficiently?	<u>Y</u>	
Daily ventilation, temperature and humidity monitoring		
Have there been any issues with the ventilation system?	<u>N</u>	
Are daily temperature readings being taken? On all decks?	<u>Y</u>	Max Temp: <u>30</u> Max Humidity: <u>85%</u>
Are these occurring at the same time each day?	<u>Y</u>	<u>4 times</u>
Are these readings capturing the maximum temperature/humidity level each day?	<u>Y</u>	
Daily Animal inspection, monitoring and treatment		
Are animals that require treatment (e.g. shy feeders, heat stressed, injured or ill animals) being identified and brought to the attention of the AAV in a timely fashion?	<u>Y</u>	
For vessels with split level sheep pens - are all sheep in split level pens being monitored daily?	<u>Y</u>	
Pen Condition		
Are the pens in appropriate condition and good order?	<u>Y</u>	

Provide an assessment of the quality of the manure pad in the pens (e.g. dusty, friable, crumbly, muddy, thick, boggy, liquid). What is its approximate depth?		Dryer conditions and the dampethol sheep pads are drying out to between
Have any problem pens been identified with respect to pad condition or ventilation? What is being done to manage this?	N	-cattle crumbly & muddy still boggy 1/2 mcl hrs ✓ thin or heaped. ewy
Is there management and intervention for pads that are deteriorating in condition? What is being done?	Y	see before 48 hrs
Is the ventilation in the pens adequate?	Y	
Are any found dead animals removed from the pens in a timely fashion?	Y	
AAV's daily activities		
Does the observer agree with the assessment provided by the AAV in the Daily Voyage Report?	Y/N	The report is mostly fine however he s. 47F(1) forgets to mention that
Are mortalities being accurately recorded and reported?	Y	the cattle are being treated for lameness as well
Have euthanased animals been counted and recorded <u>separately</u> from those found dead?	Y	
Have pregnant ewes been identified on the vessel? How many, in what lines? How are they being managed?	Y	} 1 lamb is Nursing per with ewe & well managed mothers daughter doing well
Are there pregnant cattle on the vessel? How many, in what lines? How are they being managed?		
Are births and abortions being accurately recorded and reported?		
How are any neonatal animals managed?		
Has the AAV carried out any treatments? What for? How? What medications?	Y	Cereals } all drift } all normal } lense } eyes } occurrences etc }
Are there any other comments regarding conditions or any other aspect worthy of note?	N	
Digital image capture		
Images/video captured?		Yes/No

Daily Checklist

Date: 8-5-18

Your welfare
Are you OK? Y

Have you contacted your DAWR contact?
Emal s. 22(1)(a)(ii) YES NO
You are required to check-in with your DAWR land based contact every day prior to the Master sending the daily voyage report. If your DAWR contact has not heard from you by the time the daily voyage report arrives, urgent efforts will be made to contact the Master of the vessel immediately to ensure your welfare.

Access to Feed and Water

Question	Yes/No	Comments
Are there issues with animals accessing feed and water?	N	
Is feed and water continuously available? If not, why, and for how long?	Y	
Is the supply of feed and water appropriate for the conditions?	Y	
Is the equipment monitored and operating efficiently?	Y	

This is making little difference to vent access to structure

Daily ventilation, temperature and humidity monitoring

Have there been any issues with the ventilation system?	Y	ONE OF THE VENTILATION FANS TO CATCH DEWLS SLOWED - FIXED TODAY
Are daily temperature readings being taken? On all decks?		Max Temp: <u>31°</u> Max Humidity: <u>85%</u> <i>Quincy 4hr water in circuit</i>
Are these occurring at the same time each day?	N	TODAY THE TEMP SPIKED PM - was wet cool or very windy PM
Are these readings capturing the maximum temperature/humidity level each day?	Y	<i>Broken down gen needs replace ~ 26 WBT</i>

Daily Animal inspection, monitoring and treatment

Are animals that require treatment (e.g. shy feeders, heat stressed, injured or ill animals) being identified and brought to the attention of the AAV in a timely fashion?	Y	
For vessels with split level sheep pens - are all sheep in split level pens being monitored daily?	Y	THE UPPER LEVEL PENS ON BRON HAVE LESS SHEEP THAN LOWER

Pen Condition

Are the pens in appropriate condition and good order?	N	after the storm and torrential rain last night ~ 1/4 of the sheep pens are muddy. crew working on fixing this today shovel a sand mat
---	---	---

Provide an assessment of the quality of the manure pad in the pens (e.g. dusty, friable, crumbly, muddy, thick, boggy, liquid). What is its approximate depth?	FROM FRINGE → muddy due to severe o/w storm for sheep & cattle & DAMAGES remain	
Have any problem pens been identified with respect to pad condition or ventilation? What is being done to manage this?	N	muddy liquid FRINGE
Is there management and intervention for pads that are deteriorating in condition? What is being done?	Y	clean shovel out & saw dust Drain water when site after
Is the ventilation in the pens adequate?	Y	storm
Are any found dead animals removed from the pens in a timely fashion?	Y	
AAV's daily activities		
Does the observer agree with the assessment provided by the AAV in the Daily Voyage Report?	Y	
Are mortalities being accurately recorded and reported?	Y	yes in number there was an issue with the possible drowning of a bull today
Have euthanased animals been counted and recorded <u>separately</u> from those found dead?	Y	3 sheep today - see my daily notes
Have pregnant ewes been identified on the vessel? How many, in what lines? How are they being managed?		} Still 2 lambs born to ewes that stayed away with the wetters - with well & cared
Are there pregnant cattle on the vessel? How many, in what lines? How are they being managed?		
Are births and abortions being accurately recorded and reported?		
How are any neonatal animals managed?		
Has the AAV carried out any treatments? What for? How? What medications?	Y	General lame for well ill that eyes etc
Are there any other comments regarding conditions or any other aspect worthy of note?	Y	Today we had the first instance of major miscommunication with the will death & disposal so daily notes
